NON-STRUCTURAL BEST MANAGEMENT PRACTICES:

VACUUM AND BRUSH REMOVAL OF DEBRIS

CATCH BASIN CLEANING OF DEBRIS AND POLLUTANTS

POWERFUL MAGNET TO COLLECT FERROUS MATERIAL

HIGH PRESSURE WASHDOWN TO CLEAN ADA RAMPS

Your Schwarze Dealer.

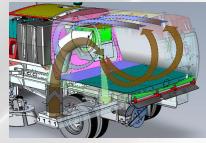

Street sweeping is a best management practice (BMP) that can serve the entire community. With catch basin cleaner equiped you can go to work immediately after purchase as opposed to structural BMPs like storm ponds that only serve a dedicated area and require engineering and construction. This makes sweeping the most cost effective BMP per impervious acre treated [King, Hagen, 2011]

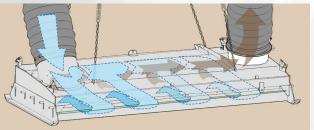

A7 TornadoTM 8.4 Cubic Yard Multi-Purpose Regenerative Air Sweeper

Effective January of 2017, the EPA Final MS4 General Permit Remand Rule requires "clear, specific, and measurable permitting" conditions for measuring BMP implementation. In addition, MS4s that discharge to impaired waters must develop a total maximum discharge limit (TMDL) strategy and plan to reduce sediment, phosphorous, and nitrogen discharged into protected watersheds. The new ruling also requires greater public participation in the NPDES permitting process.

Schwarze regenerative air technology makes use of both positive pressure and vacuum airflow, this maintains the compressed air in a sealed loop and is not returned to the atmosphere like traditional vacuum sweepers.

> The blast and recovery cycle continues indefinitely with no air leakage.

Regenerative Air Technology

Regenerative air sweepers generally only need 100KW to do the same amount of work as pure vacuum sweepers with 200KW.

> Pressurized air is forced across an "air knife" approximately 2.5 meters wide across the sweeping head. This scrapes the roadway surface with a sheet of pressurized air, lifting dirt and debris off the pavement.

Schwarze and its global dealer network understands your challenges and helps stormwater managers meet these conditions while being good stewards of taxpayer dollars.

We make sure the correct features are included to optimize municipal sweeping programs such as:

- Reducing trips to the landfill so you can continue working and keep earning credits.
- Catch basin suction hoses with high pressure water.
- Telematics for integration with your GIS system to document work for compliance and show citizens that their streets and catch basins have been cleaned.

ADE IN THE USA

Up to 144" Sweep Width

40" Dump Height

Large Saw-Tooth Increased Hopper Screen Design

High Pressure Water Spraygun

Powerful Height Adjustable, Cab Controlled Sell-Dumping Front Magnet

CAN-Bus Control Panel with Backlit Switches, Text and Icons

44" Recessed Gutter Brooms with Shielded Broom Motor

Backup Camera

Heavy Duty Catch Basin Vacuum Hose with Hand Controls

Bolt-On Tubes

Sweepers are also a great traveling billboard. We work with your program to design wraps that promote "clean streets, clean stream" initiatives, or our popular "only rain in the storm drain" promotion.

"We started with Schwarze back in the early 2000s and we now have four A7 Tornado sweepers. I like Schwarze equipment, it's not over-complicated equipment, the systems are easy. When we have a breakdown it's easy to fix with North American parts, next day shipping, great customer service, it's beautiful." Additional Available Regeneratice Air Sweepers:
